

QR Service Installation Manual

(WITHOUT MOBILE APPLICATION REQUIREMENT)

Downloading and Installing the QR Service

1. Navigate to www.posvrp.com. When the page loads, click on Useful Links.

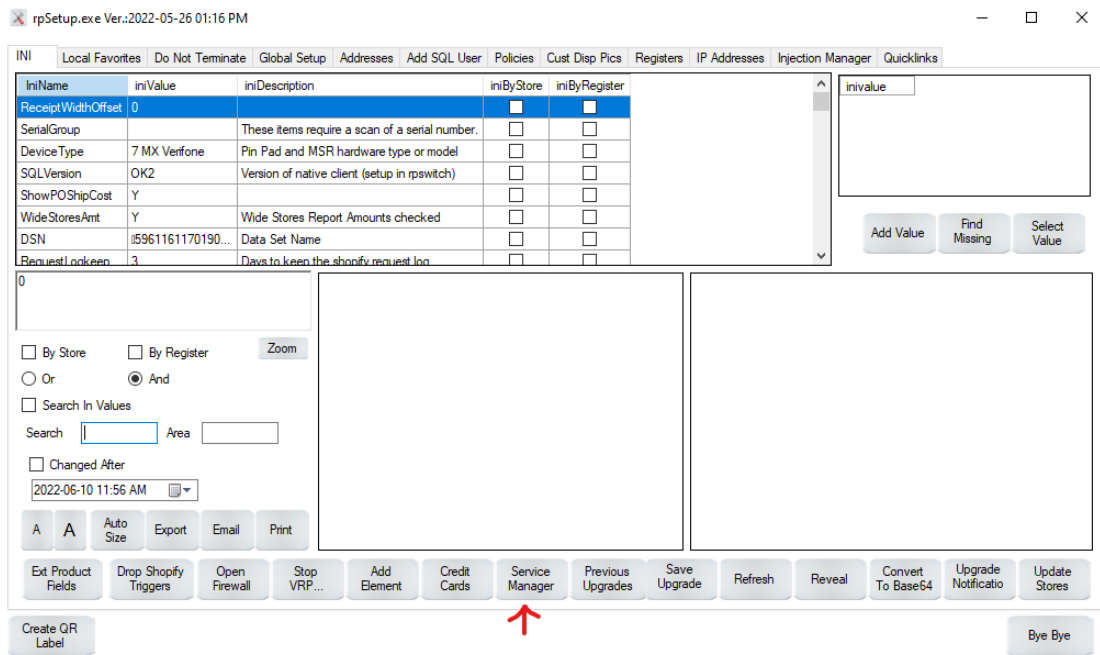

2. Scroll down to the bottom of the page and find the Web Suite Section. Click on QR Service Installation for Login and Time Clock (zip). This will download a zip file containing the service files.
3. Find the downloaded file and extract it to the following location **C:\pos\rppublish**. You might need to create a new folder in the c:\pos directory called **rppublish** if it already doesn't exist.

4. Login to VRP and click on the Setup button.

5. Click on the Service Manager button.

6. Find the QR Security Service in the list of services. And click on install service.

← 1.

A A Auto Size Export Email Print Install Service ← 2. Bye Bye

7. You will get the following message box with the path of the service in the input box. You will need to add more information in the input box **after** the path of the service.

vrp services

Service for installation

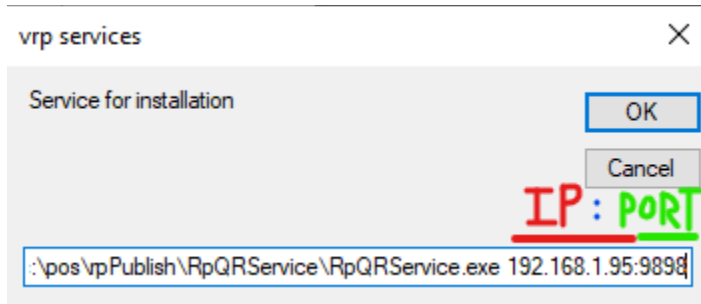

OK

Cancel

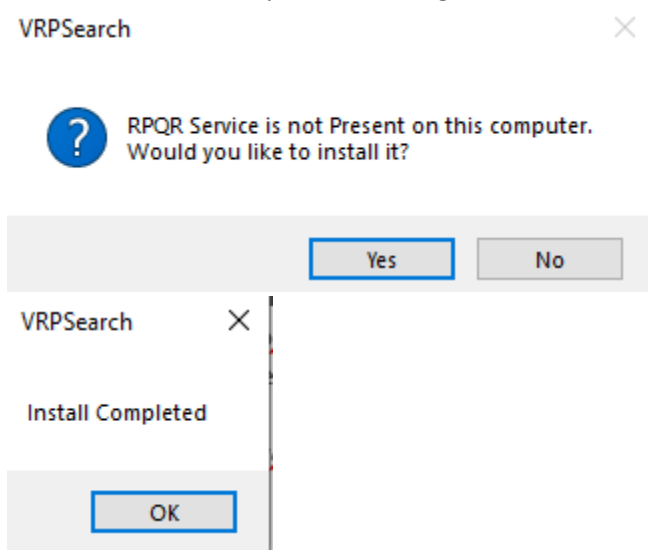

c:\pos\vpPublish\RpQRService\RpQRService.exe

- Find the local IP Address of the computer that you are installing the service on and decide on a free port (ex. 9898,8444) to install the service on. Add the **ipaddress:port** as shown in the picture after the service path separated by a space. When ready, click OK.

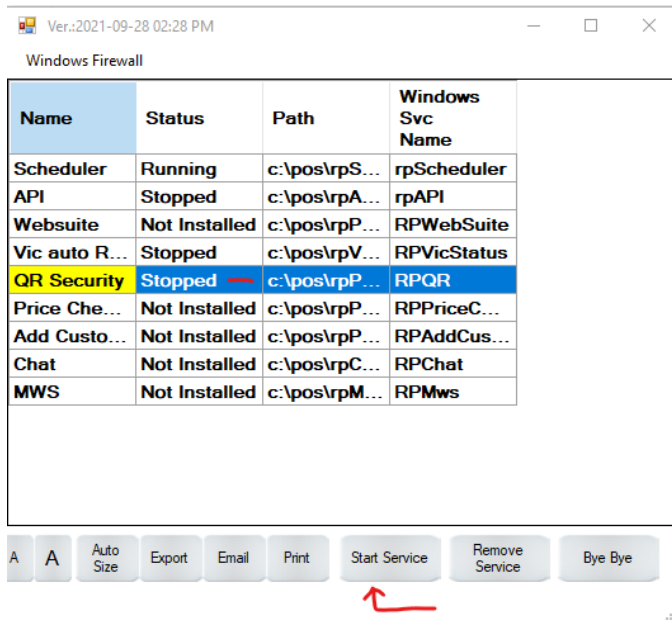

FORMAT: `c:\pos\vpublish\vpqrService\vpQRService.exe {ipaddress}:{port}`

- You will get the following message box. Click on Yes. Once the installation completes, you will receive a "Install Completed" message box.

- The service status should then change from "Not Installed" to "Stopped". You can click on Start Service button to start the service.

User Registration, Login and Time Clock

1. In order to Register a User's Phone to their account, login in to VRP as an Admin. Go to Utilities > Users.

2. Search for the user you are trying to register and click on Search.

Buttons: Search, A, A, Auto Size, Export, Email, Print, Register Mobile, Add New User, Copy Layouts..., Delete User, Rename User, Copy User, Print Access Key, Biometrics, Encrypt All Passwords, Type By Hour Of Day, Save, Bye Bye

- When you click the button, a QR Code will appear on the screen. Use your phone's camera application to scan the QR which should open a website on your phone's browser and register the phone.

The screenshot shows the 'rpUsersAndSecurity' application window. At the top, there is a table listing users:

usercode	FullName	EmployeeType	ReportsTo	Company	Rep	DefaultStore	UD1	UD2	UD3	UD4
joetp		cash			02					1139
joeyg		cash			02					1140
Joel	Joel Mosh...	assis								
3rt	joel mosh...									

Below the table is a detailed user form for 'joetp'. It includes fields for Employee Type (cash), Password, Full Name, Phone, Fax, Mobile, Address, City, State, Zip, Hired (1/1/2000), Terminated (3/10/2023), Hourly Rate (10), SSN, Reports To, Company, Default Store, Rep (02), User Defined fields (1-5), Language, Alt User Code, Allowance, and User's Email Setup (Server, Port, User, Password, Use SSL, From Name, From Email). A 'Scan To Register' QR code is visible in the bottom right area of the form. At the bottom of the window, there are buttons for Search, A, A, Auto Size, Export, Email, Print, and Intro Video, along with a 'Scan To Register' button.

You will see the message on your phone regarding whether the registration was successful. If not successful, try to register again.

If successful, you are all set to login to VRP using your phone. You can close and restart VRP and try scanning the QR in the VRP Login Screen to log in.

The screenshot shows the 'rpPOS7.exe' application window. The title bar indicates the version is 6/16/2022 5:34:48 PM. The window contains the following information:

- File Utilities
- Custom Triggers Found
- Framework: 4.8.04084
- Ver Date: 6/16/2022
- Hub
- DB: 127.0.0.1\sqlserver\ALICE
- Store: 01
- Reg: 01
- Public IP:
- Local IP: 192.168.1.95
- VRP# Release 7.01
- vrp visual retail plus logo
- Scan To Login QR code with a red arrow pointing to the 'Scan To Register' button in the previous screenshot.
- User dropdown menu showing 'ADMIN'.
- Password input field.
- OK button (handshake icon).
- Bye Bye button (exit icon).

You can also use your mobile phone for Time Clock application where you can scan the QR to open a website on your phone where you can choose punch in or out.
